

App Dev & Maintenance for Educational Institution

PROJECT DETAILS

 Custom Software Development, Application Management & Support

 Jul. 2021 - Ongoing

 Confidential

 *"I'm satisfied with our engagement and see a long-term partner in their team."*

PROJECT SUMMARY

Ahdus Technology aids the maintenance and development efforts of an educational institution. The team implements necessary application updates and builds new modules and admin panels through Firewall and PHP.

PROJECT FEEDBACK

Establishing their team's unrivaled technical expertise, Ahdus Technology continues to impress their client with high-quality and proactive solutions that meet their standards. The team employs a dedicated and result-oriented approach, ensuring a continued and agreeable collaboration.

The Client

Introduce your business and what you do there?

I'm the founder & CEO of Zaigen GmbH, an educational institution.

The Challenge

What challenge were you trying to address with Ahdus Technology?

We needed their app maintenance and development services.

Thomas Köhler
CEO, Zaigen GmbH

Education

Zurich, Switzerland

CLIENT RATING

The Approach

What was the scope of their involvement?

Ahdus Technology handles our app maintenance and development efforts. Our existing app is an educational platform — we offer a variety of quizzes for users to take and reward them with coins for every correct answer. Users can then use trade their acquired coins for virtual training sessions.

They use Firebase and PHP to integrate new features and modules into our platform and are currently building a desktop version of the app. We've also tasked them with updating our confirmation document in the app and developing a backend panel that enables insurance companies to upload quizzes on our platform.

What is the team composition?

Ammar (Founder) is my primary contact, and there's a team of 3–4 resources working on the project.

How did you come to work with Ahdus Technology?

I reached out to several companies — out of those respondents, it was Ammar's team that understood my needs and values. They also offered a reasonable price point, so I was happy to hire their team.

What is the status of this engagement?

Our ongoing collaboration with Ahdus Technology commenced in July 2021.

The Outcome

What evidence can you share that demonstrates the impact of the engagement?

We've only been working with Ahdus Technology, but I've witnessed how motivated they are to help me meet my goals

through their high-quality services. Overall, I'm satisfied with our engagement and see a long-term partner in their team.

How did Ahdus Technology perform from a project management standpoint?

We communicate via Zoom, email, and phone calls. Ahdus Technology's members are responsive and dependable — they keep me in the loop at all times and even work on weekends when needed.

What did you find most impressive about them?

They are extremely customer-oriented and motivated, which makes for a seamless and proactive partnership.

Are there any areas they could improve?

There are times when we have to reiterate what we're saying due to language barriers.

Do you have any advice for potential customers?

Be honest in relaying your goals and communicate openly with their team. You'll make the most of your collaboration if you're firm in stating what you want.
